### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The allowability resides in the overall structure of the device as recited in sole pending independent claim 1, and at east in part, because claim as amended (by Applicant's Amendment filed on 12/22/04) recites: "wherein the deflection element span is characterized by a thickness that is modulated (emphasis added) along the span". The aforementioned limitations in combination with all remaining limitations of claim 1 are believed to render the claim and all claims dependent therefrom patentable over the art of record. The optimization of curved beam MEMS structure involving modulation of beam's thickness is a novel approach that constitutes an important feature of the present invention. None of the references cited during prosecution of the instant application has disclosed such thickness-modulated MEMS structures. None of the cited references either taken alone or in combination is believed to render the present invention unpatentable as claimed.

2. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
